The Federal Communications Commission has determined that a modification substantially changes the physical dimension of a wireless tower or base station under 47 U.S.C. § 1455(a) if it meets one of six enumerated criteria under 47 C.F.R. § 1.6100. (Check Box If No)

<input type="checkbox"/>	1. Does the modification increase the height of the tower by more than the greater of: (a) 10%; or (b) the height of an additional antenna array plus separation of up to 20 feet from the top of the nearest existing antenna?	
<input type="checkbox"/>	2. Does the modification add an appurtenance to the body of the tower that would protrude from the edge of the tower more than 20 feet or more than the width of the tower structure at the level of the appurtenance, whichever is greater?	
<input type="checkbox"/>	3. Does the modification involve the installation of more than the standard number of new equipment cabinets for the technology involved or add more than four new equipment cabinets?	
<input type="checkbox"/>	4. Does the modification entail any excavation or deployment outside the current site by more than 30 feet in any direction, not including any access or utility easements?	
<input type="checkbox"/>	5. Does the modification defeat the concealment elements of the eligible support structure?	
<input type="checkbox"/>	6. Does the modification violate conditions associated with the siting approval for the tower or base station other than as specified in 47 C.F.R. § 1.6100(c)(7)(i) – (iv)?	

If all questions in the above section are checkmarked "No," then the modification does not constitute a substantial change to the existing tower under 47 C.F.R. § 1.6100. If any of the above six enumerated criteria are not checkmarked, then a Site Plan Amendment Checklist must be completed and submitted.
