Have a Happy Pioneer Day!

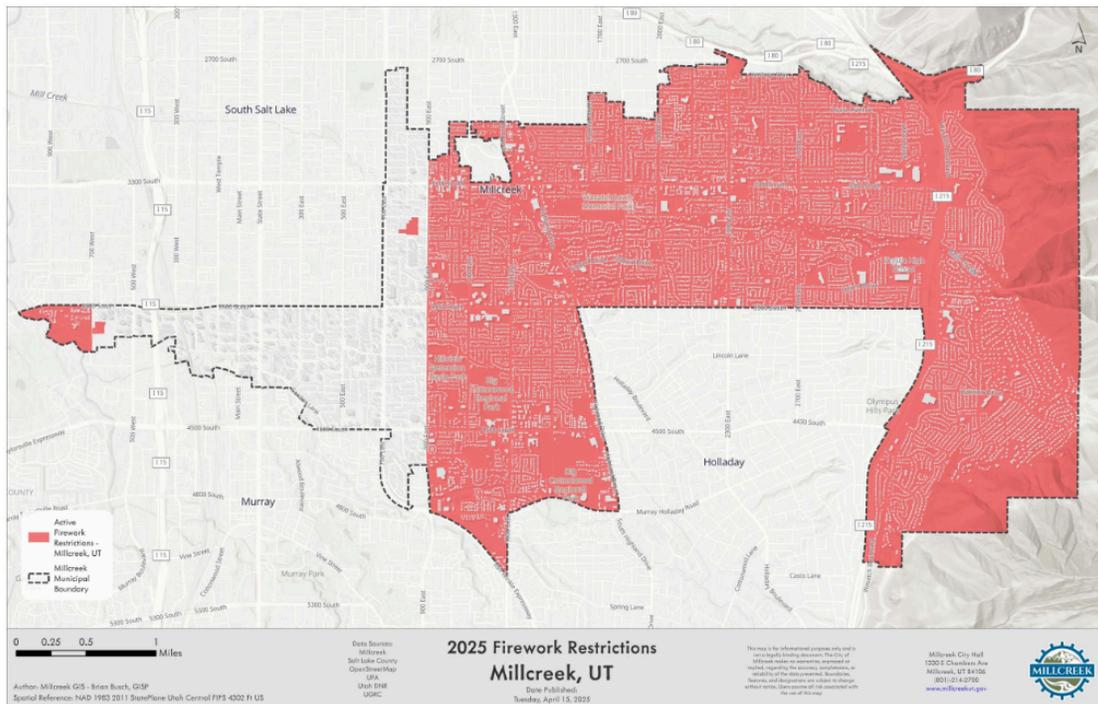

MILLCREEK – July 24th is a special day in Utah, celebrating the arrival of the pioneers into the Salt Lake Valley. With many people off work, everyone seems to have their own favorite way to enjoy the holiday.

Don't miss the Free Pie & Root Beer Day at Millcreek Common, happening from 6 to 8 p.m. on the 24th! Can't make it that evening? No worries—the Common, featuring its popular roller skating rink and climbing wall, will be open all weekend long.

If you're heading to the big **Pioneer Day Parade in downtown Salt Lake City**, be sure to check the parade route and road closure map [HERE](#).

Looking for a fun and educational family activity? Take part in the **Millcreek Community Council's Pioneer Day Scavenger Hunt** to learn about the history of Millcreek—and enter to win some great prizes! (Details below.)

Prefer to spend the day in nature? Consider a refreshing hike in the Wasatch Front canyons. While **Mill Creek Canyon Road is closed below the winter gate due to construction**, all trails are still open and accessible on foot. **Please do not ride bikes in the construction zone for your safety.**

Of course, many families enjoy celebrating with a backyard barbecue followed by fireworks. Just remember: **firework restrictions are in effect**. Fireworks are not permitted east of 900 East, west of 700 West, or in Sunnyvale and Scott Avenue Parks.

Maybe your plan is to simply kick back in a lawn chair with a glass of lemonade. However you choose to celebrate, **all of us at Millcreek wish you a happy and safe Pioneer Day!**

COMMUNITY COUNCIL EVENTS

The **Millcreek Community Council** invites you to celebrate Pioneer Day by joining us on a historical scavenger hunt during the month of July. We invite all residents of the city to come see some of the geographic and pioneering variety that exists within our community. (See map below for boundaries of the Millcreek Community Council District, which includes all areas of the city west of Highland Drive.) Each of these sites has a history dating back 100 to 175 years.

To participate, learn about and visit each of the historical locations below, take a selfie at each site with at least one member of your group, submit your ten selfies along with a mailing address where the prize can be sent to millcreekpioneer@gmail.com. The first entry received will receive a \$50 gift certificate to the Iceberg! All others who complete the scavenger hunt and submit a selfie of each location will be entered to win one of fifteen \$25 gift cards to the Iceberg, Nielsen's Frozen Custard, or Arctic Circle. All entries are due by midnight on July 31st.

These historical sites are located in or adjacent to the Millcreek Community Council District boundaries of the city (see map below) and have played a part in shaping our wonderful legacy.

1. St Mark's/Westminster School of Nursing: [CLICK HERE](#) (celebrating 150 years.)
2. Pugh Home: [CLICK HERE](#)
3. First Pioneer School outside of Salt Lake City: [CLICK HERE](#)
4. Gardner's sawmill: [CLICK HERE](#)

5. General store – Big Cottonwood Cooperative: [CLICK HERE](#)
6. Brickyard: [CLICK HERE](#)
7. Fish hatchery – Scott Avenue Park: [CLICK HERE](#)
8. Calder Park: [CLICK HERE](#)
9. Millcreek Cemetery - Elysian Gardens – Chambers burial site: [CLICK HERE](#)
10. Carlisle family farm: [CLICK HERE](#)

One entry per family or group. Please follow all traffic rules and respect each property. The mailing address for prizes must be within the Millcreek City boundaries.

Have fun expanding your understanding of our amazing heritage here in the Millcreek Community Council District!

**IMPORTANT MESSAGE FROM THE SALT LAKE COUNTY HEALTH
DEPARTMENT**

West Nile Virus Detected in Multiple “Mosquito Pools” in Salt Lake County

Health officials urge residents to take precautions to avoid illness

SALT LAKE COUNTY—The Salt Lake County Health Department (SLCoHD) announced today that West Nile virus (WNV) has been detected in multiple

“mosquito pools” within Salt Lake County boundaries. “Mosquito pool” is the term used for a group of mosquitoes caught and tested out of a single trap; it is not related to swimming pools or pools of water.

The mosquito pools testing positive in Salt Lake County so far this season are in Salt Lake City, including downtown and in the Sugar House neighborhood, but SLCoHD and the county’s three mosquito abatement districts expect additional mosquito pools to test positive in coming days and weeks. Because mosquitoes can travel several miles, everyone in the region—regardless of exact location—should take precautions against mosquito bites to avoid exposure to the virus. [Information about mosquito pools positive for West Nile virus across Utah](#) is available via the Utah Department of Health and Human Services website.

“There will be a growing number of mosquitoes carrying the disease,” said Mary Hill, SLCoHD epidemiology bureau manager, “so it is now especially important that Utahns protect themselves from mosquito bites, particularly in the hours from dusk to dawn.”

Although only some mosquitoes carry WNV, there is no way for residents to tell which mosquitoes may be infected so it is important to minimize all exposure opportunities during mosquito season (which will continue until the first hard freeze):

- Use an EPA-registered mosquito repellent with DEET, permethrin, picaridin, IR3535 or oil of lemon eucalyptus; follow package directions about application.
- After dusk, wear long sleeves and pants.
- Drain standing water in yards (old tires, potted plant trays, pet dishes, toys, buckets, etc.).
- Keep roof gutters clear of debris.
- Clean and stock garden ponds with mosquito-eating fish or mosquito dunks.
- Ensure door and window screens are in good condition so mosquitoes cannot get inside.
- Keep weeds and tall grass cut short; adult mosquitoes look for these shady places to rest during the hot daylight hours.

WNV can cause mild to severe illness and many people may not even know they have been infected. It is estimated that less than 1% of people infected with WNV will develop the neuroinvasive form of the disease, which can result in debilitating long-term complications or death. Symptoms of WNV infection appear within 2 to 14 days of a mosquito bite and include fever, headache and

body aches. More severe infections may include high fever, neck stiffness, disorientation, coma, tremors and muscle weakness or convulsions.

People over age 50 and people with weakened immune systems are at the highest risk of illness due to WNV, but anyone can become ill from the bite of an infected mosquito. WNV is not transmissible from person to person.

There is no specific treatment for WNV infection other than to treat symptoms. If you think you have WNV infection, contact your health care provider.

WNV was first detected in the U.S. in 1999 and in Utah in 2003. Last year, Utah health officials confirmed that 14 people in the state contracted the virus and 12 of those resulted in the neuroinvasive form of the disease. In 2024 there were no recorded deaths from WNV in Utah; one Utahn died from the disease in 2023. Because only 20–30% of infected people will have any symptoms at all—and many of those will notice only minor, flu-like symptoms—it's likely that infection with WNV is more prevalent than the reported case numbers indicate.
